

Dear students,

Let me to welcome you in the core elective "Brain - mechanisms and pathophysiology of its higher functions".

The whole program consists of eight lectures across winter and summer semester. To get your credits it is required to attend at least six times (75% attendance). Given this is rather mild limit, please do not ask for any exceptions. Also, it is wise to backup your credit requirements by some other enrollment.

Our first 4 sessions will be held on Mondays 12.11., 19.11., 26.11. and 3.12. at 4:15 pm in UNIMEC hall.

We'll speak about concept of storing the information in the brain, about memory types & corresponding structures.

Cordial greetings,

Karel Ježek
